

is our hotel revenue growing by year ?

Yes the revenue is increasing each year but let's not forget 2020 is the covid 19 year so the revenues are down comparing to the year before but still much more that 2018 revenues for both hotels types

Should we increase our parking lot size?

unfortunately the dataset doesn't has any other data to help us decide if we need an increase or not , yes the total parking is increasing in 2019 but there are not enough evidence to tell if the hotels managed to deal with it or not , but let's not forget 2020 year and covid 19 so the temporary answer is 'no' specially 2020 results are a lot less that 2019 and very nigh to 2018 results.

what room type affected the revenue the most ?

room type A accounts for the majority of total revenue.

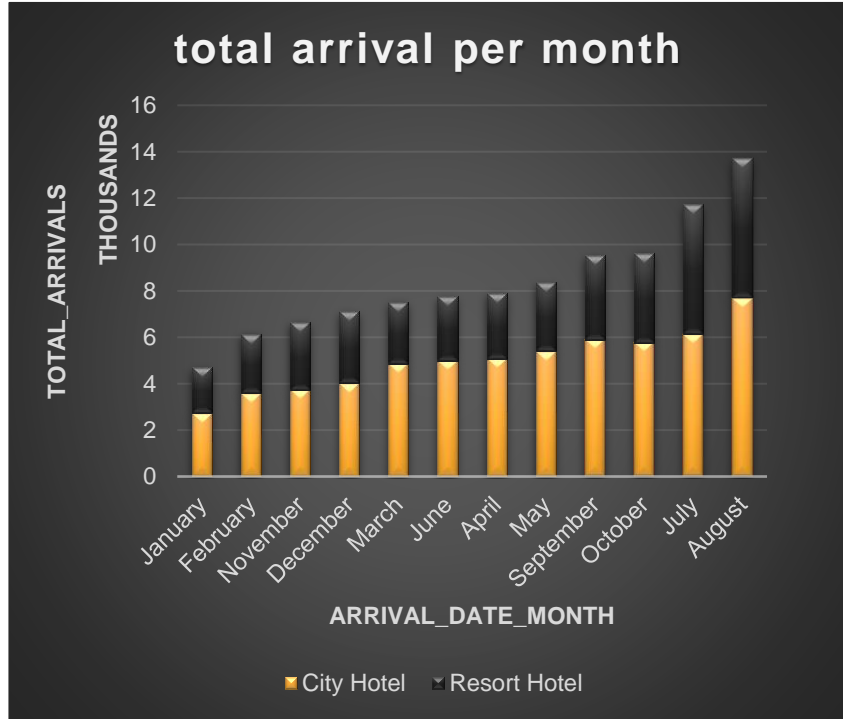

A
D
E
F
G
C
H
B

what is the best month to focus on ?

As we can see august is the best month for both hotels maybe because it's the vacation month of most of the countries around the world ...

The recommendation is increase the entertainments and give more offers and better discounts .
